Training Opportunity

Quality Improvement in Public Health

Wednesday, April 10, 2013
9:00 AM- 4:00 PM

Knox County Health Department
1361 W. Freemont Street
Galesburg, Illinois 61401

Join us for an interactive skill-building training session on Quality Improvement in public health. Participants will gain an understanding of the principles for QI, learn the basic Model for Improvement and Plan-Do-Study-Act rapid cycle improvement model along with several problem analysis tools. The training is designed as a basic course and is applicable to all interested in QI. Come with a process improvement or problem in mind that you can work on during the training alone or with a team. We encourage you to bring a small team that may work on the project if possible.

Training Objectives:

- Describe the role of QI within a Performance Management System
- Define and differentiate Quality Improvement, Quality Planning, and Quality Assurance
- Describe the Model for Improvement (PDCA) and Rapid Cycle
- Apply Work Flow Analysis Tools
- Understand the role of data with QI
- Select and apply Problem Analysis Tools
- Describe strategies to building a culture of Quality Improvement within your organization

Presenters

Laurie Call

Director of the Center for Community Capacity Development at the Illinois Public Health Institute

Julie Sharp

Health Data and Quality Coordinator at the Kane County Health Department
